

Mansi Joshi

Web3 Developer • Multi-Chain Builder • Content Creator

📍 Ahmedabad, India ✉️ mansijoshi1777@gmail.com 🐙 mansijoshi17 🌐 LinkedIn ✂️ @imansi_joshi

SUMMARY

Web3 developer passionate about building decentralized applications that solve real-world problems. Experienced in smart contract development, multi-chain deployments, and crafting intuitive user experiences for complex blockchain interactions. Hackathon enthusiast with 100+ open-source repositories and deployments across 12+ chains. Also a content creator on YouTube (**BlockchainHQ**), making Web3 accessible through Hindi-language tutorials.

EXPERIENCE

Web3 Developer

Present

CodeCrunch Techlabs • Ahmedabad

- Build and deploy decentralized applications across multiple blockchain networks including Ethereum, Polygon, Solana, Base, Flow, and Fantom
- Develop smart contracts in Solidity and Cadence with integrated testing using Hardhat and Truffle
- Architect frontend interfaces with React.js, Next.js, and Tailwind CSS for seamless Web3 user experiences
- Specialize in encrypted digital vaults, NFT marketplaces, and DAO management tooling
- Implement decentralized storage solutions with IPFS and Filecoin for secure data persistence

FEATURED PROJECTS

CrypticVault

Decentralized digital vault with encrypted IPFS storage, NFT-based access control, inheritance planning, and encrypted messaging via XMTP.

Solidity React IPFS Polygon XMTP

ScamBuzzer

Multichain shield against crypto scams featuring wallet risk scoring, private scam detection via Nillion LLM, address poisoning protection, and anonymous reporting.

TypeScript Nillion TEE Node.js

NFT Marketplace

AI-powered generative NFT marketplace for PFPs, game assets, and metaverse avatars with Chainlink VRF for provable randomness on Flow blockchain.

Cadence

Flow

React

Chainlink

Trustified

Blockchain-powered digital certification platform issuing forgery-proof NFT certificates and badges with token-gated access for organizations and DAOs.

Solidity

React

Fantom

Filecoin

DecentraTool

DAO management suite with role-based NFT memberships, Superfluid payroll streaming, decentralized document vault, and anonymous whistleblower system.

Solidity

Superfluid
